

Backpack Mapping - Capturing Reality

Employing a compact integration of imaging, LiDAR, GNSS, and navigation (IMU) we reach the most inaccessible of locations to simultaneously capture a one of a kind geospatial data fusion solution!

Highly accurate and actionable data

Rapid collection that provides a data rich 3D immersive view of your world

Let us show you the art of possible with our portable scanning “on the go” technology!

Applications:

- ❖ Utility & Power Line Management (encroachment, asset management, inspection)
- ❖ Disaster & Remediation Mapping
- ❖ Facility Management
- ❖ Public Safety
- ❖ Smart Cities
- ❖ Stockpile Inventory
- ❖ Forestry
- ❖ BIM

Key Benefits:

- ❖ Operation versatility and flexibility for indoor, outdoor, underground, or otherwise restricted mapping environments
- ❖ Digesting environments with highly accurate and actionable data
- ❖ Rapid collection that provides a data rich 3D immersive view of your world
