

## Street Level Mapping - 360° Imagery

- Capture 360-degree, 30-megapixel geo-referenced images
- Mapping grade photogrammetric system
- Rapid collection at highway speeds
- Geo-reference of mapping data
- Cost Effective asset management
- Enables post collection analysis of assets
- Avoid Site Rework and increase quality control

### Map & Manage Assets:

- Public Works
- Utilities
- Engineering
- E-911
- GIS
- Road & Bridge
- Railway
- Mining
- Oil & Gas
- Communications
- Large Scale Mapping
- Construction Documentation

## Capture Now – Measure Later

Avoid site rework and benefit from increased quality control and data validation by capturing the data now and measuring later. With our processes and tools, we can visually observe and capture the job site, then produce a deliverable later, giving the ability to extract additional data and features without having to re-visit the site.

### Mobile Mapping Services

#### Collection:

Collect Mobile Mapping data on a variety of vehicle platforms around the world

#### Feature Extraction:

Any visible feature can be located, measured, and exported to a GIS dataset

#### Post Processing:

Whether collected by customer or by us, we can geo-reference the mobile mapping data

#### Training:

On-Site training in Hardware and software anywhere in the world

#### Rental/Sales:

Buy or rent any Mobile Mapping hardware and software we supply
